

Centre of Excellence in Fungal Research's Announcement

Subject : Laboratory safety policy

This is a policy for managing the laboratory to ensure good health and safety at work in Center of Excellence in Fungal Research, Mae Fah Luang University. According to safety standards, cooperation and responsibility of stakeholders, including lecturers, researchers, students, and staffs who are working with Center of Excellence in Fungal Research are required to follow the rules and regulations given below:

1. Occupational safety and health

The Center of Excellence in Fungal Research have implemented a number of measures to ensure safe working conditions in laboratories and working areas. The utilities and environment facilitate work and do not cause health issues of performing personnel. Working and laboratory safety guidelines have been laid down for those who use the facility to conduct research as well as other activities related to the Center of Excellence in Fungal Research, Mae Fah Luang University. Please cooperate by strictly complying, taking into considering your own safety, colleague and assets throughout the period of work.

2. Knowledge management and evaluation

Persons who conduct research in the laboratory will receive training according to specified criteria. Training results would need to verify and pass an evaluation before receiving approval from the research advisor or supervisor. Thereafter, Center of Excellence in Fungal Research will grant the permission to work in the laboratory. The Center of Excellence in Fungal Research will conduct inspection and evaluation of operational efficiency. If there is a defect, there will be criteria implemented for accuracy and to complete the evaluation.

3. Preventing accidents and responding to emergency situations

Goals of performances under the Center of Excellence in Fungal Research, Mae Fah Luang University focus on preventing accidents that cause damage to person and property. Therefore, the performance guidelines provides instruction for experimental tools, equipment and chemicals that covers risk management. The performances and risk management report is required for consideration before sending to the Center of Excellence in Fungal Research, Mae Fah Luang University. In emergency situations the Center of Excellence in Fungal Research will establish basic management guidelines and notify relevant personnel and agencies, including making a report summarizing the incident and forwarding it to the acting director of the Center of Excellence in Fungal Research, Mae Fah Luang University.

Please adhere to this regulation of Laboratory safety policy from now on

Announced for your information on 25 of March, 2024
